ESG REPORT

Definitions

Energy Intensity	Amount of energy consumed in kilowatt hours per square foot in 2021
Water Intensity	Amount of water consumed in gallons per square foot in 2021
Greenhouse Gas Intensity	Amount of greenhouse gas emissions per square foot in 2021
Waste Intensity	Amount of waste produced in kilograms per square foot in 2021

Peer Benchmark

Energy, water and greenhouse gas intensity are all compared to a benchmark to evaluate performance. Green indicates the building is outperforming the benchmark and red indicates the building is underperforming the benchmark. The benchmark represents the energy, greenhouse gas and water intensity of our 2022 GRESB peer group. This peer group is made up of similar residential multi-family buildings in the US who also submit to GRESB.
